USER PERSONA

SHERIN

Age : 21 Years Old
Location : Erode, TamilNadu
Occupation : Computer Engineer
Major : CSE

Background

- Final-year engineering student placed through campus recruitment.
- Uses technology for learning and research.
- Preparing for corporate onboarding.
- Enjoys solving problems and finding solutions.
- Learns through online courses and videos(Youtube).

Goals

- Gain practical experience.
- Strengthen problem-solving skills.
- Complete real-world projects.
- Learn new technologies.

Notes

I want one platform to learn, practice, and grow professionally.

Pain Points

- Difficulty finding quality learning resources
- Lack of practical industry experience.
- Information overload from different platforms.
- Difficulty finding structured learning paths.

USER PERSONA

MANOJ KUMAR

Age	: 30 Years Old
Location	: Chennai, TamilNadu
Occupation	: HCLTech Trainer
Major	: EEE

Background

- Technical Trainer at HCLTech.
- Uses technology for learning and research.
- Guides students in AI/ML projects and hackathons.
- Believes in project-based and experiential learning.
- Encourages practical learning through real-world case studies.

Goals

- Develop practical AI/ML skills.
- Encourage project-based learning.
- Mentor future AI engineers.
- Design engaging learning experiences.
- Stay updated with AI trends.

Pain Points

- Students have different skill levels.
- Low student engagement in online sessions.
- Difficulty tracking individual student progress.
- Students lack hands-on project experience.
- Limited interaction during virtual classes.

Notes

Learning should be interactive, practical, and aligned with industry needs.

USER PERSONA

MS.ROOPA C

- **Age** : 30 Years Old
- **Location** : Perundurai, TamilNadu
- **Occupation** : Assistant Professor at KEC
- **Major** : CSE

Notes

True learning happens when students apply concepts, not just memorize them.

Background

- Assistant Professor in the CSE Department.
- Over 4 years of teaching experience.
- Believes strong fundamentals come from textbooks.
- Encourages students to apply theory through practical work.
- Promotes continuous learning and innovation.

Goals

- Encourage practical learning over memorization.
- Help students understand concepts deeply.
- Promote project-based learning.
- Assess students through practical tasks.
- Provide personalized guidance.

Pain Points

- Students rely too much on memorization.
- Low interest in practical learning.
- Difficulty engaging students in class.
- Limited time for hands-on activities.
- Large class sizes reduce individual attention.
- Inconsistent participation in project work.a

USER PERSONA

KALAIVANI

Age : 30 Years Old
Location : Perundurai, TamilNadu
Occupation : Supporting Staff at KEC
Major : 10th

Background

- Lab Supporting Staff in the Food Technology Department.
- Assists faculty during practical classes.
- Prepares equipment and materials before lab sessions.
- Helps students access course materials and submit practical assignments.
- Provides technical support during online and offline practical sessions.

Goals

- Ensure smooth practical sessions.
- Resolve technical issues quickly.
- Maintain lab equipment and safety.
- Share lab manuals and learning resources.
- Improve students' practical learning experience.
- Help students understand practical concepts.

Pain Points

- Students struggle to use the online platform.
- Technical issues during practical sessions.
- Limited time to support every student.
- Difficulty monitoring practical progress.
- Organizing digital learning resources.

Notes

A smart learning platform should make practical learning easier for students and simpler to manage for staff.

USER PERSONA

DEEPAK KUMAR

- **Age** : 19 Years Old
- **Location** : Tirupur, TamilNadu
- **Occupation** : 2nd Year CSE Student at KEC
- **Major** : CSE

Notes

I want one platform that helps me learn, practice, and prepare for my future career.

Background

- Second-year Computer Science student.
- Interested in programming and emerging technologies.
- Uses online learning platforms to supplement classroom learning.
- Participates in coding contests and workshops.
- Enjoys hands-on projects and collaborative learning.
- Aims to build a strong technical foundation before placements.

Goals

- Build strong programming fundamentals.
- Learn through practical exercises.
- Improve coding and problem-solving skills.
- Prepare for internships.
- Track learning progress.
- Improve academic performance.
- Learn at her own pace.

Pain Points

- Difficulty understanding complex programming concepts.
- Unsure where to start learning new technologies.
- Limited practical experience.
- Too many learning resources causing confusion.
- Lack of personalized learning guidance.
